

1

次の□にあてはまる数をかきましょう。

$$\textcircled{1} (7 \times 7) + (2 \times 7) = (\square + \square) \times 7$$

$$\textcircled{2} (40 + 6) \times 8 = (40 \times \square) + (6 \times \square)$$

$$\textcircled{3} (19 - 2) \times 4 = (\square \times 4) - (\square \times 4)$$

$$\textcircled{4} (50 \times 6) - (39 \times 6) = (\square - \square) \times 6$$

$$\textcircled{5} (23 + 8) \times 5 = (23 \times \square) + (8 \times \square)$$

2

次の□にあてはまる数をかき、つづきの計算をして答えをもとめましょう。

$$\begin{aligned} \textcircled{1} \quad & 102 \times 16 \\ & = (\square \times 16) + (2 \times \square) \end{aligned}$$

$$\begin{aligned} \textcircled{2} \quad & (45 \times 6) - (5 \times 6) \\ & = (45 - \square) \times 6 \end{aligned}$$
